A CT Scanner is a specialised imaging tool essential for diagnosing many conditions. North Coast Veterinary Services provides CT scans at an affordable rate. After a referral from your regular vet, your pet comes to us for the scans which are reviewed by a specialist veterinary radiologist who will report directly to your vet. We work with your pets favorite vet to ensure the best outcome.

Please don't feed your pet for 12hrs prior to your visit for their safety under a short anaesthetic whilst the scans are performed.

If you have any concerns or additional questions, please call 02 6684 0735 or check our website northcoastvetservices.com.au.
